A. ATCHYUTARAO

AZURE DATA ENGINEER | CLOUD DATA PLATFORMS | PYTHON & SQL

+91 9959469644 | atchyut2025@gmail.com | linkedin.com/in/atchyutaraoa

Portfolio: atchyut96379.github.io/My_Portfolio/

PROFESSIONAL PROFILE

Data Engineer with 8+ years of IT experience spanning enterprise ETL/ELT development, Azure and GCP data platforms, Python and SQL engineering, workflow orchestration, and Power BI reporting. Experienced in developing and supporting analytics-ready data pipelines, cloud migration, data quality, production incident resolution, and Dev/UAT/Prod releases. Recent project work includes Azure-based People Platform/ESG data engineering and Dagster orchestration for mortgage risk and hedging analytics. Collaborative engineer with hands-on experience in cross-functional delivery, CI/CD validation, troubleshooting and production stabilization.

CORE TECHNICAL SKILLS

Microsoft Azure: Azure Data Factory (ADF), ADLS Gen2, Azure Databricks, Azure SQL, Mapping Data Flows, Delta Lake

Data engineering: Python, PySpark, SQL/T-SQL, ETL/ELT, data warehousing, data modeling, transformations, data validation, partitioning

Cloud & orchestration: GCP BigQuery, Cloud Storage, Dataproc, Apache Airflow, Cloud Composer, Astronomer, Dagster, AWS EKS

Analytics & databases: Power BI, DAX, SQL Server, SSIS, SSRS, Polars, DuckDB; Bloomberg SFTP and Refinitiv APIs

Engineering & operations: Azure DevOps, Git, Docker, Kubernetes, Helm, pytest, Pydantic, CI/CD, Jira, ServiceNow, Agile

PROFESSIONAL EXPERIENCE

COGNIZANT TECHNOLOGY SOLUTIONS INDIA PVT. LTD. | Senior Associate

09 Apr 2025 – Present

Project 2: SitusAMC – IT | VARS Hedging Advisory | 22 Jan 2026 – Present

Technology: Python, Dagster, SQL Server, Polars, DuckDB, Delta Lake, AWS EKS, Docker, Kubernetes, Helm, Azure DevOps, pytest

- Developed and supported Python/Dagster asset-based pipelines within an orchestration platform covering 50+ mortgage risk and hedging analytics jobs.
- Supported ingestion and processing of market data from Bloomberg SFTP and Refinitiv APIs for rate processing, Compass roll-forward, cap-grid analytics, calibration and reporting.
- Worked with a hybrid Linux and Windows execution model: Dagster code servers on AWS EKS, Windows agents with Dagster Pipes and SQL Server-backed job queues.
- Investigated job failures, scheduling and partition issues; supported environment comparisons and production stabilization across development, UAT and production.
- Developed and reviewed fixture-based pytest unit tests for critical pipelines and participated in pull requests, release validation and CI/CD activities.

Project 1: IKEA IT – People Platform ESG | 09 Apr 2025 – 18 Dec 2025

Role: Azure Data Engineer | Azure Data Factory, ADLS Gen2, Azure Databricks, Azure SQL, PySpark, Delta Lake

- Developed and supported data ingestion and ETL/ELT processing for People Platform and ESG datasets using Azure data engineering services.
- Worked with ADF pipelines, ADLS Gen2 storage, Databricks/PySpark transformations, Delta Lake processing and Azure SQL data validation.
- Collaborated with QA, DevOps and business teams on data quality, troubleshooting, release validation and downstream reporting needs.

EARLIER PROFESSIONAL EXPERIENCE

HEXAGON R&D INDIA PVT. LTD. | Senior Software Developer

09 Jan 2023 – 05 Mar 2025 | Data Engineer – Mining Domain

- Designed and maintained scalable Python, PySpark and SQL ETL/ELT workflows for operational, equipment and production data.
- Worked with BigQuery, Cloud Storage and Dataproc for cloud-based data processing and migration of on-premises workflows.
- Scheduled and monitored pipelines using Apache Airflow; performed data validation, reconciliation, SQL optimization and incident resolution.
- Partnered with stakeholders and QA teams to translate business requirements into reliable data solutions.

SMARTEK21 PVT. LTD. | Senior Software Engineer

06 Apr 2022 – 06 Jan 2023 | Data Engineer / Power BI Developer – T-Mobile

- Developed SQL and Python-based ingestion and transformation workflows and curated datasets for telecom reporting.
- Created Power BI reports and dashboards with DAX measures, KPIs, drill-down views and business-facing visualizations.
- Worked on BigQuery data models, data quality checks, Airflow scheduling, dataset refresh, incremental loading and row-level security.

CUREUS TECHNOLOGIES PVT. LTD. | Software Engineer

05 Mar 2018 – 05 Apr 2022 | Power BI / SQL Reporting & Production Support

- Built Power BI dashboards and SQL reporting datasets, including transformations, business requirements analysis and report validation.
- Supported SQL Server environments through query troubleshooting, monitoring, incident response, change management and root-cause analysis.
- Worked with business and support teams to resolve production issues, improve reporting reliability and maintain service commitments.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Google Cloud Certified: Professional Data Engineer | Listed validity: 2025–2027

Microsoft Certified: Power BI Data Analyst Associate (PL-300) | Listed validity: 2024–2025

Certified SAFe Agile Practitioner | Listed validity: 2023–2024

Data Science and Machine Learning (DSML) Certification – Scaler Academy

EDUCATION

Bachelor of Technology (B.Tech) – Jawaharlal Nehru Technological University, Kakinada

AWARDS & RECOGNITION

Smart Spot Award – Excellence in Innovation (July 2022) | SmartTeam Award | Business appreciation awards
